Country of origin: UK United Kingdom

REVIVER ATX CABLE

Image	Order Code	Manufacturer Name & Part#	Product Description	Tech Info
	Reviver ATX	**REVIVER** PRP-ATX	**REVIVER ATX CABLE**	**ATX Cable** This has the effect of monitoring the power rails and the 4.5 volt on the motherboard, which will immediately send information that the 4.5 volt line is good, low or not OK to the Reviver System Monitor Software. This is very useful when trying to establish remotely over the LAN/WAN if the motherboard has an IC blown etc. and not allowing a boot of any description or the power supply is not OK. The effect can be to greatly reduce downtime and provide a first-time fix.
